

Bird Probability

Teachers print the bird pictures multiple times. Print the first page 5 times, the second page 3 times and the last page 1 time. Past images on card stock. Take the collection of bird images and sort them. Remove some of the bird cards to increase the likelihood that other birds will be drawn.

Common Bittern

Magpie

Swift

Jackdaw

Stork

Sparrow

Song Thrush

Yellow Hammer

Pheasant

Bird Probability

Name: _____

You are with a group of scientists conducting a census of the birds in a local forest. You want to know what kinds of birds live in your forest.

Use the table to record what you find (think about using tally marks):

| Type of Bird: | Number you found: |
|---------------|-------------------|
| | |
| | |
| | |
| | |
| | |
| | |
| | |
| | |
| | |
| | |

From the information you have gathered, what do you think will be the **most** common bird in the entire forest?

Why? _____

From the information you have gathered, what do you think will be the **least** common bird in the entire forest?

Why? _____
