## Freshwater on Earth

All the Water on the Planet:

97% of the water on earth is not drinkable.

3 % of the water on earth is freshwater.

Color the not drinkable portion red.

Color the freshwater portion blue.

The part you colored blue above is just a small portion of the water of the world. Below let's describe just the freshwater.

Just the Freshwater

68% of the freshwater is ice in glaciers or icecaps

31 % of the freshwater is in ground

1 % of freshwater is in rivers or lakes.

Color the ice water white

Color the groundwater dark blue

Color the river water purple.
